Sanya

A clean energy-powered lighting solution

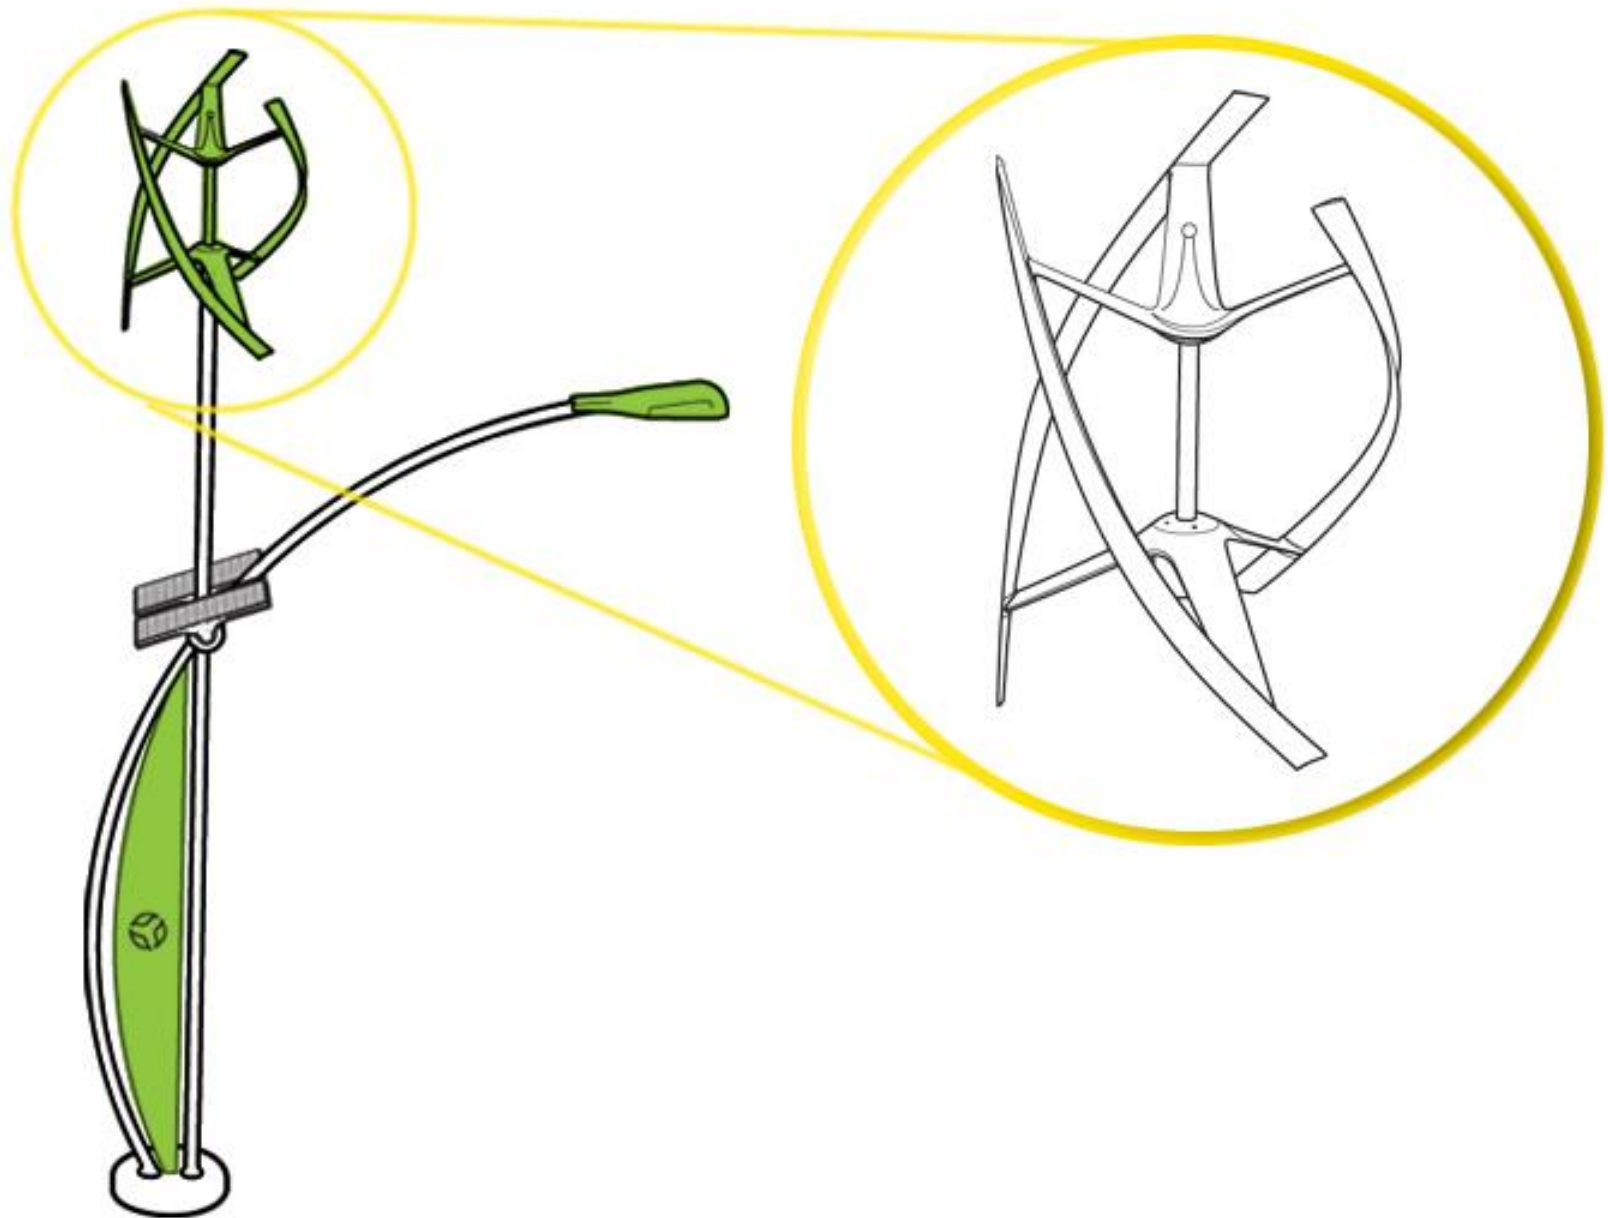

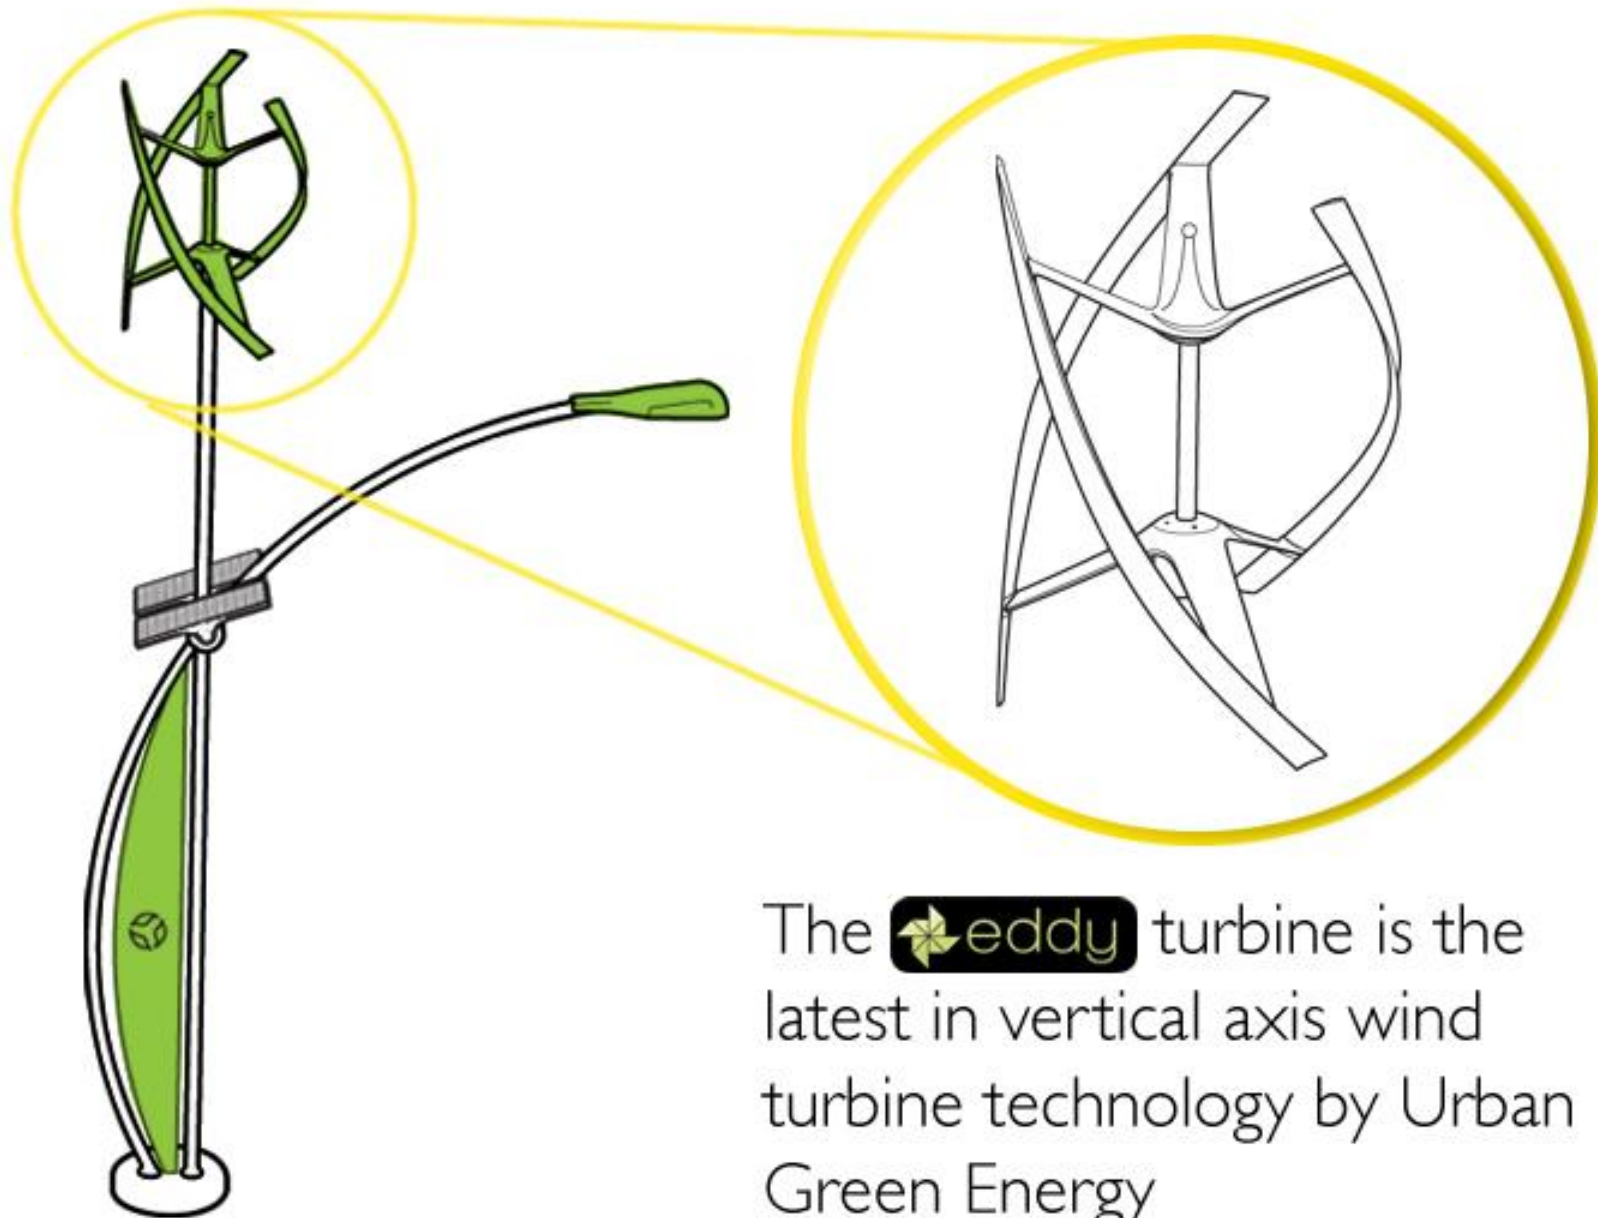

Sanya

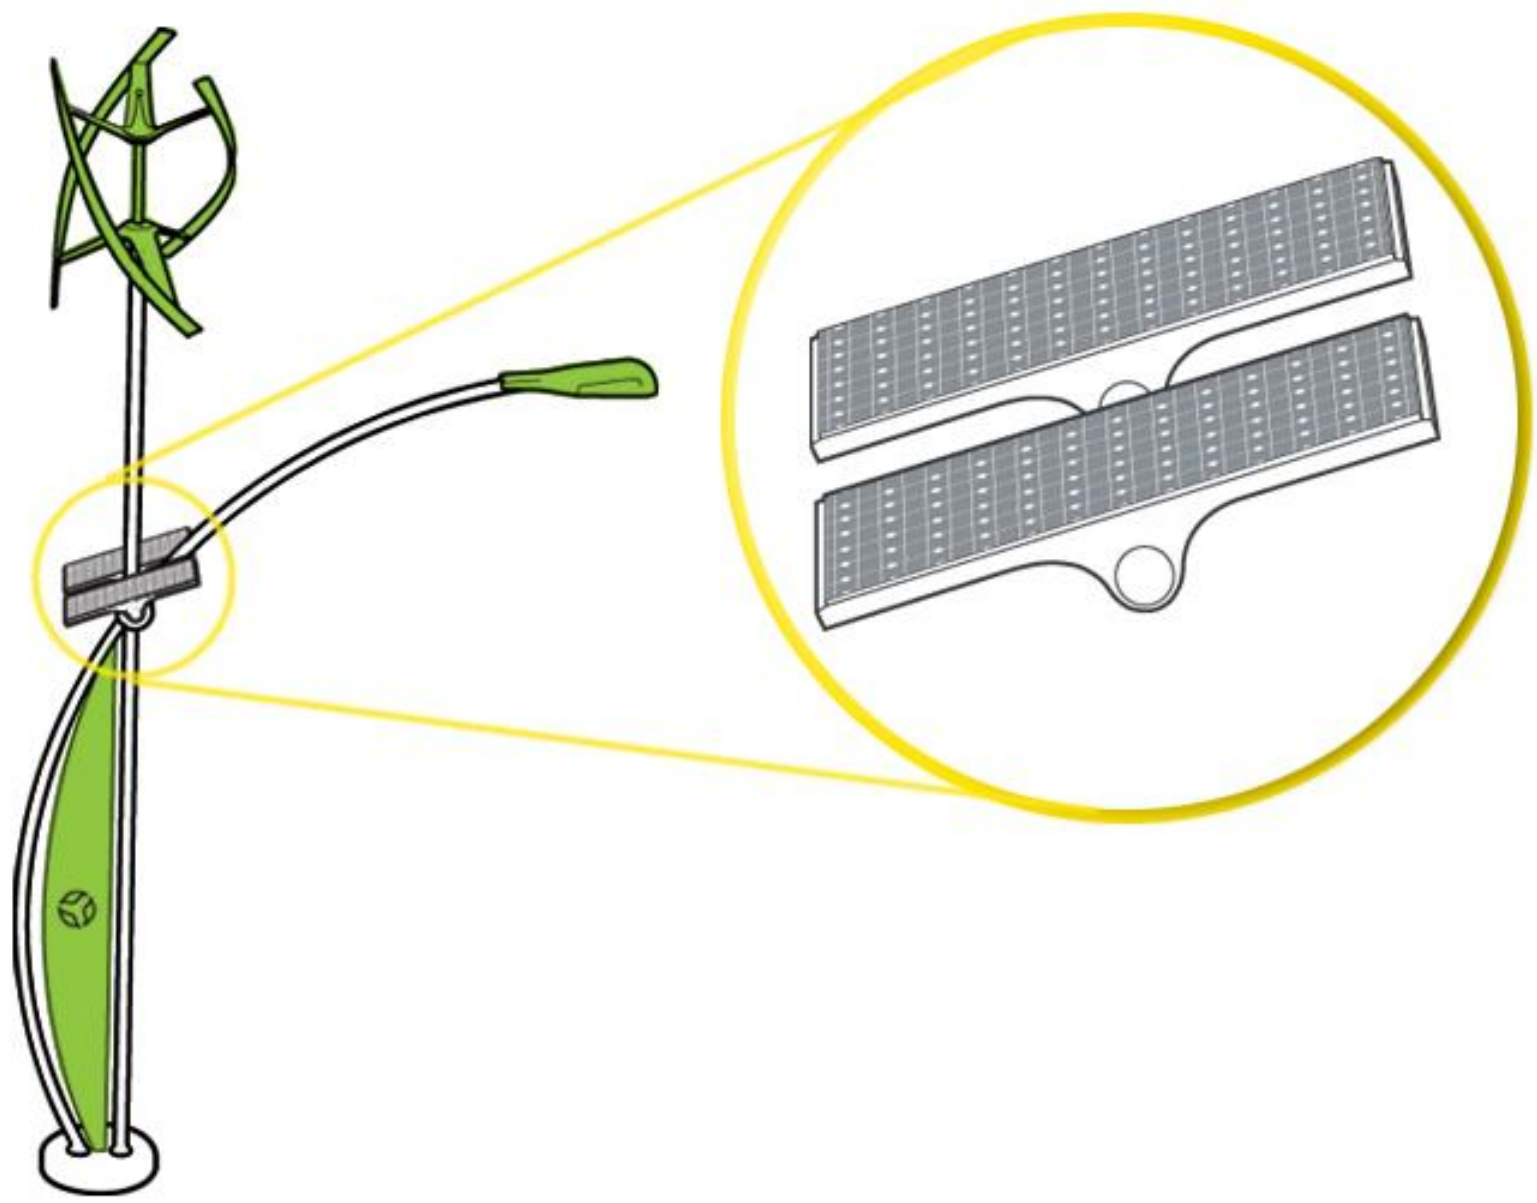

Sanya

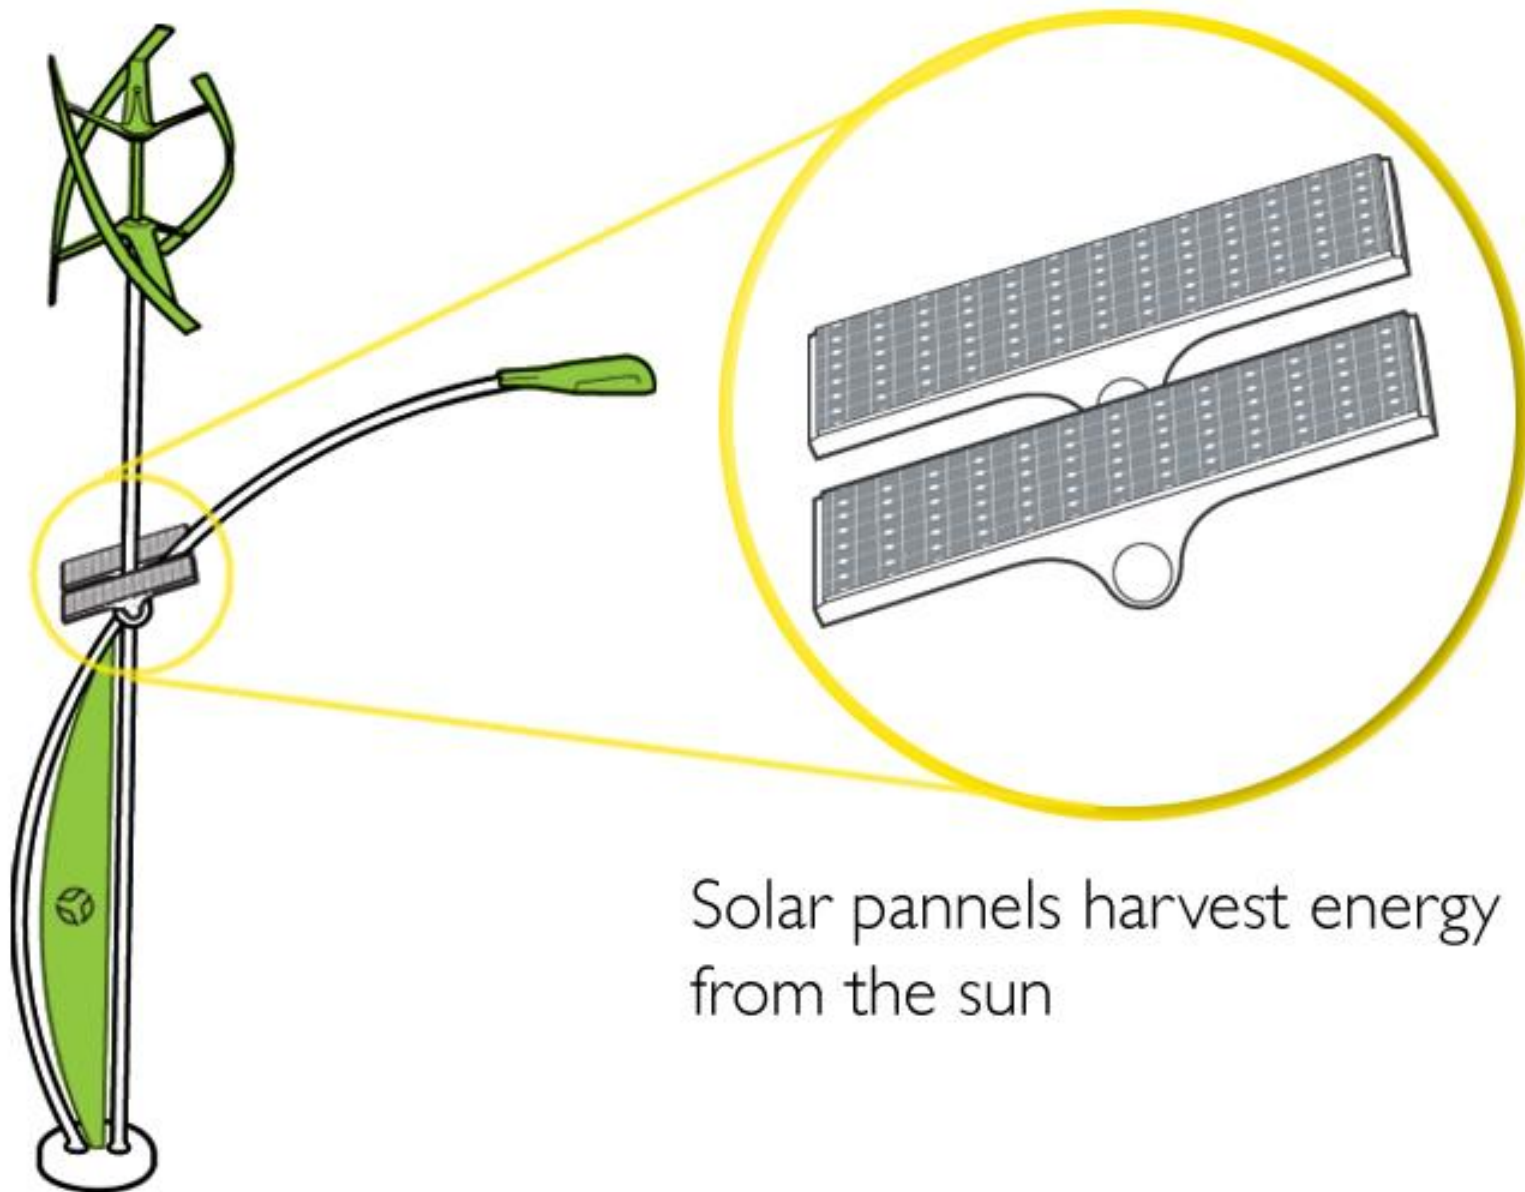

How does it work?

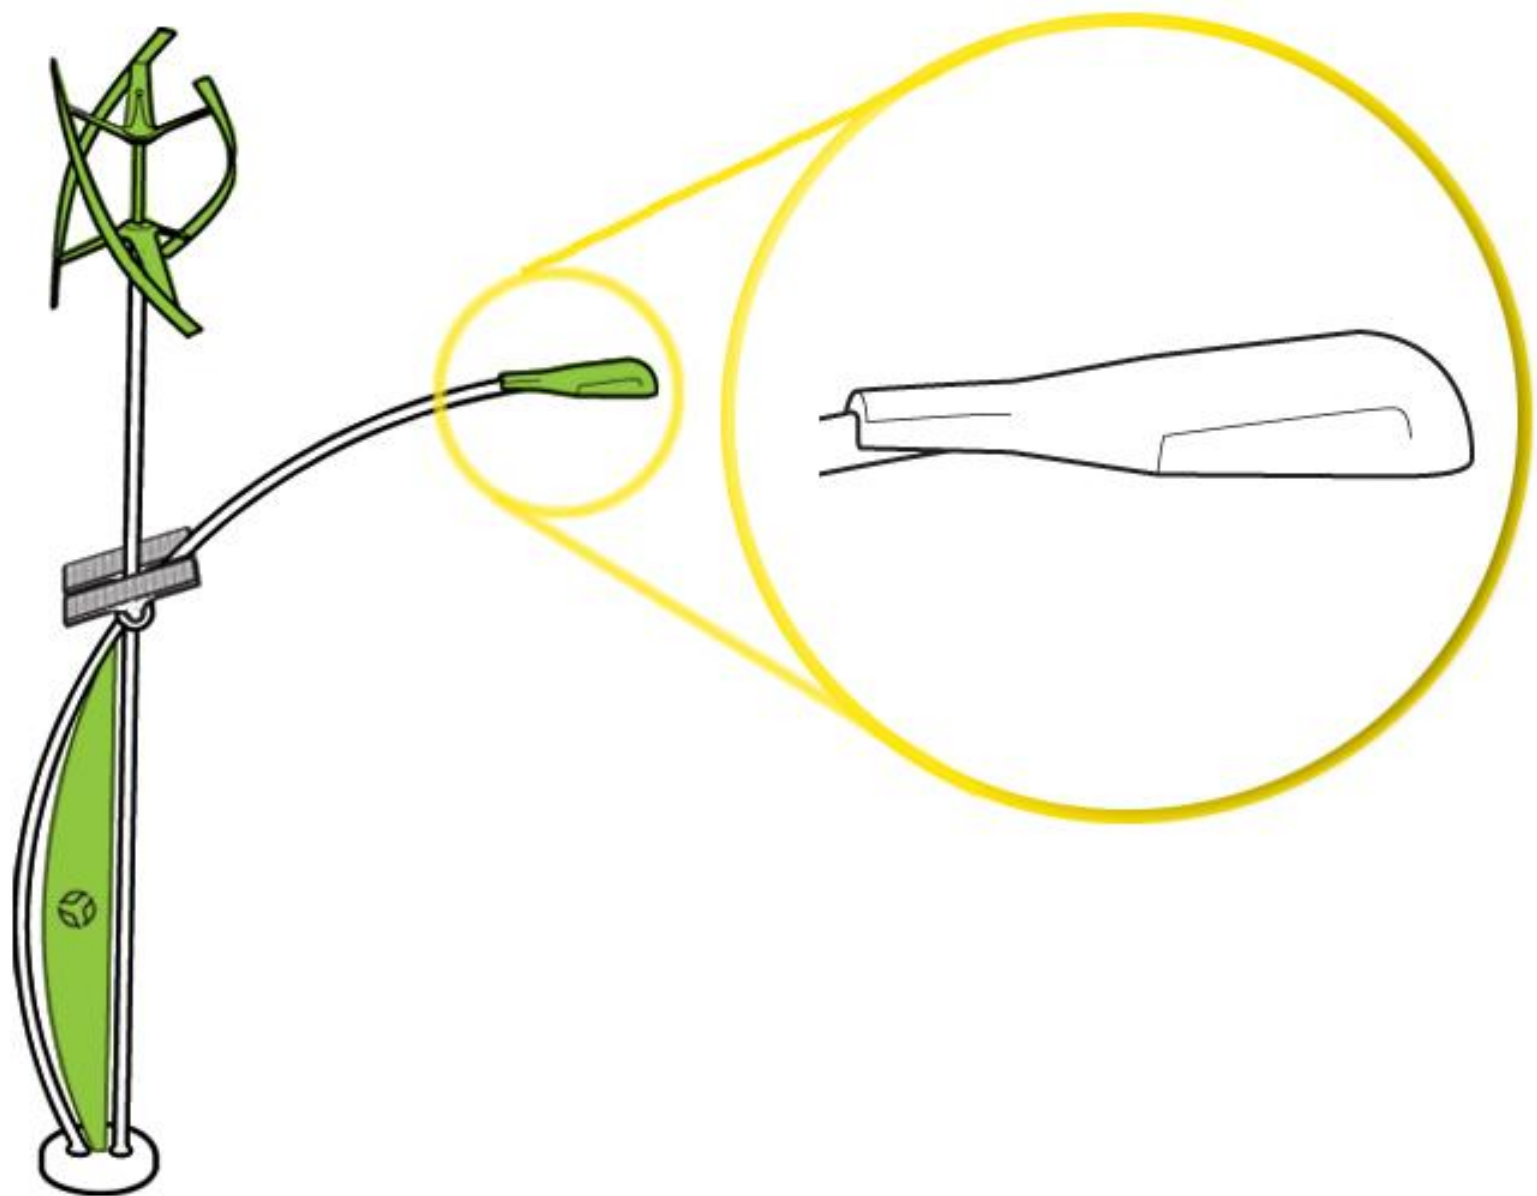

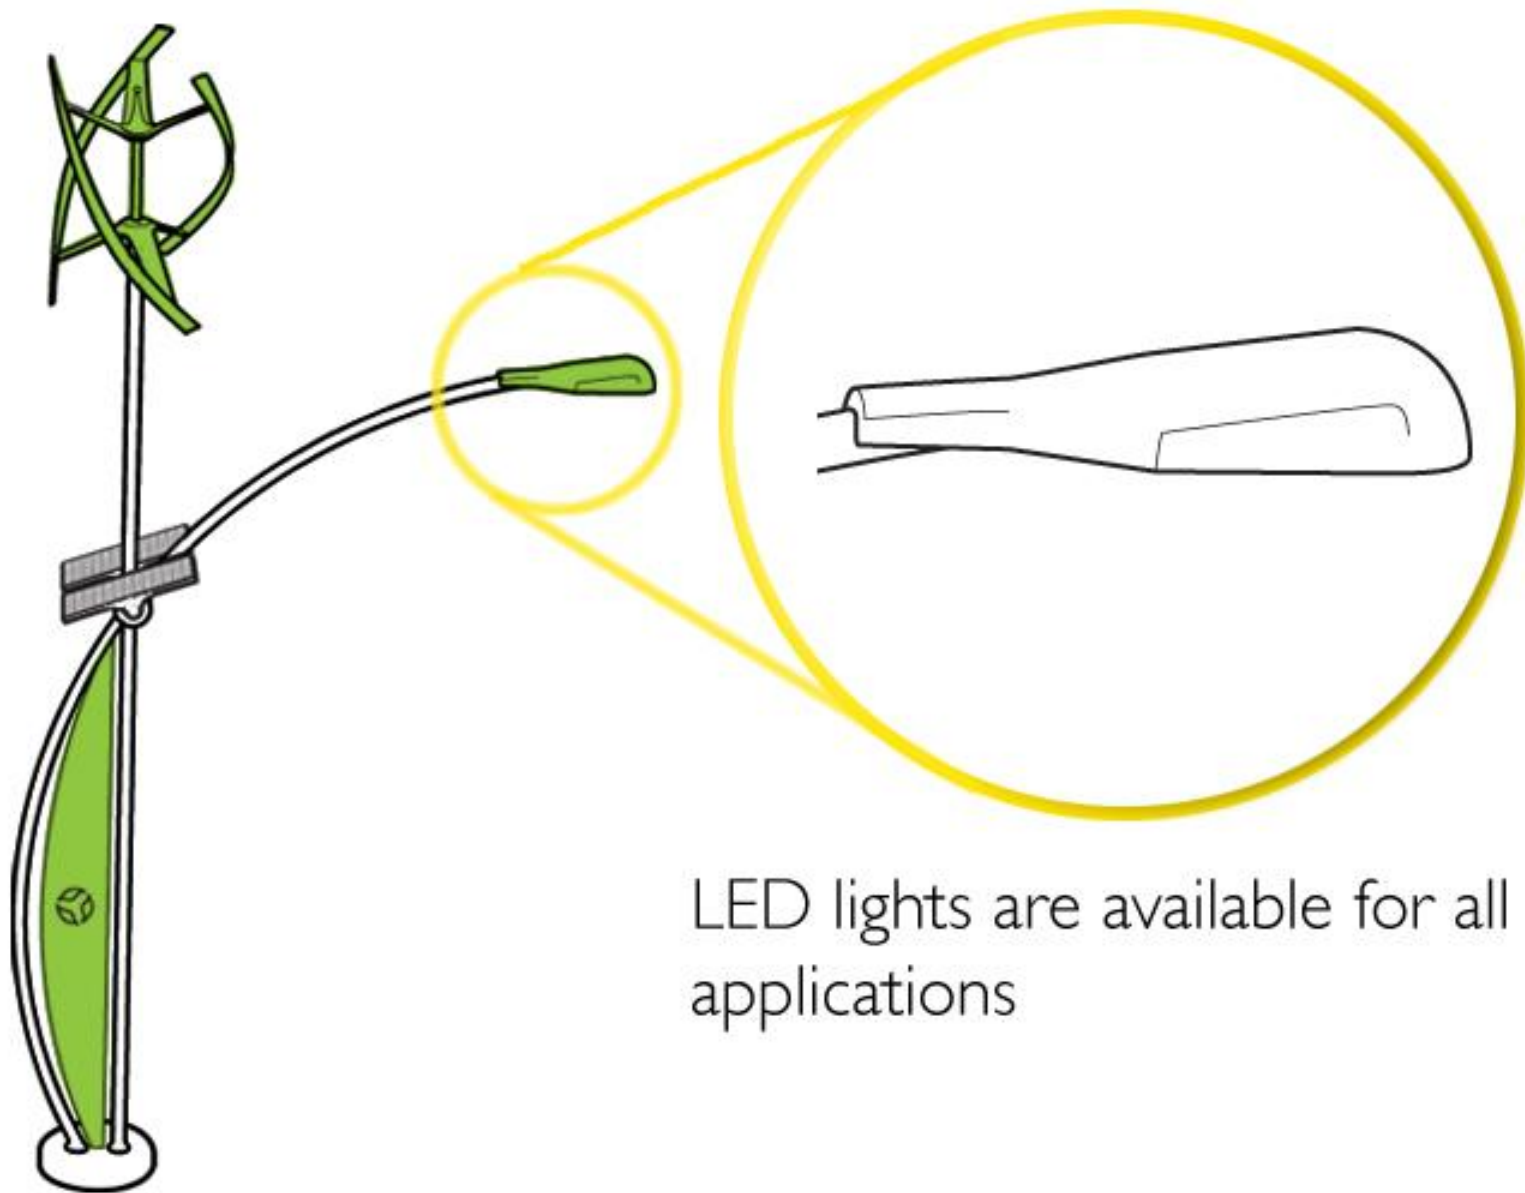

The  eddy turbine is the latest in vertical axis wind turbine technology by Urban Green Energy

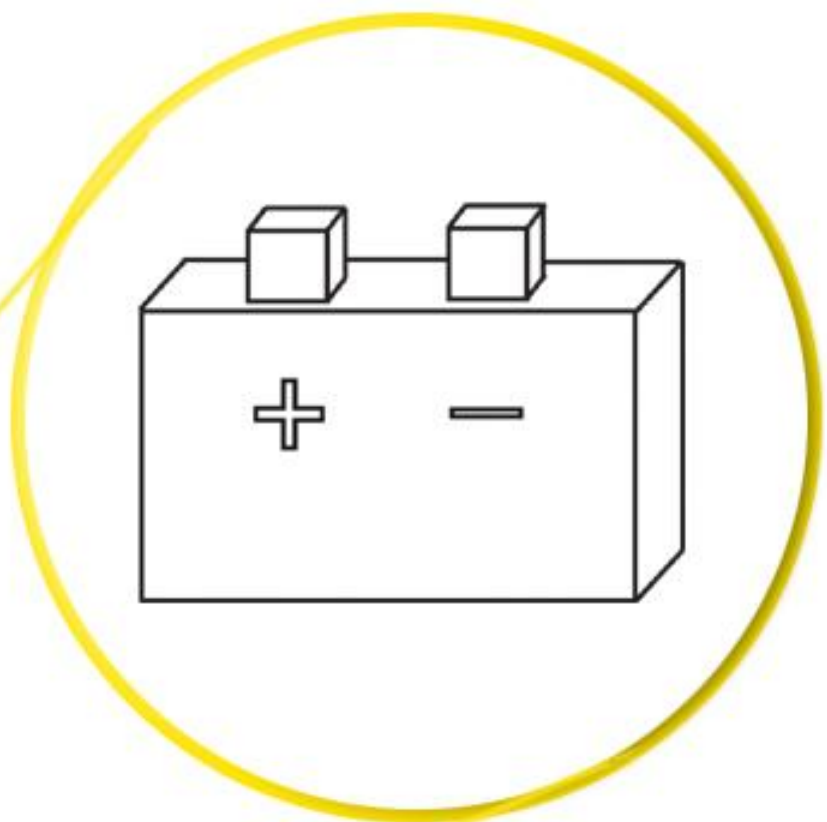

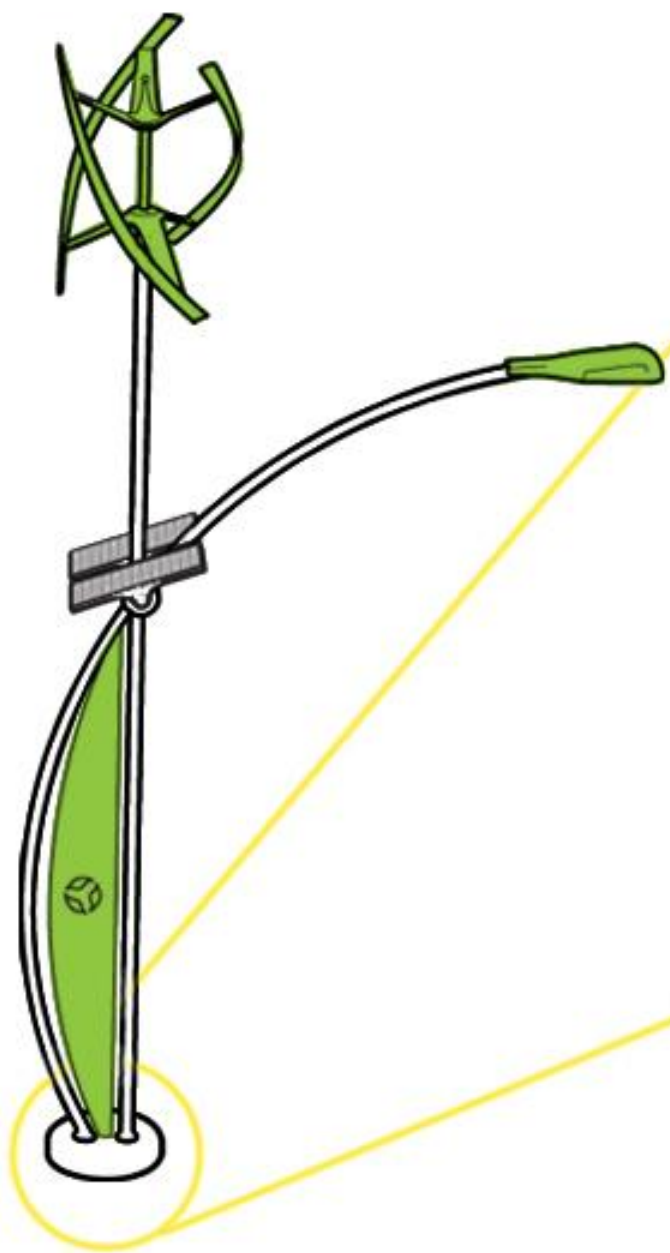

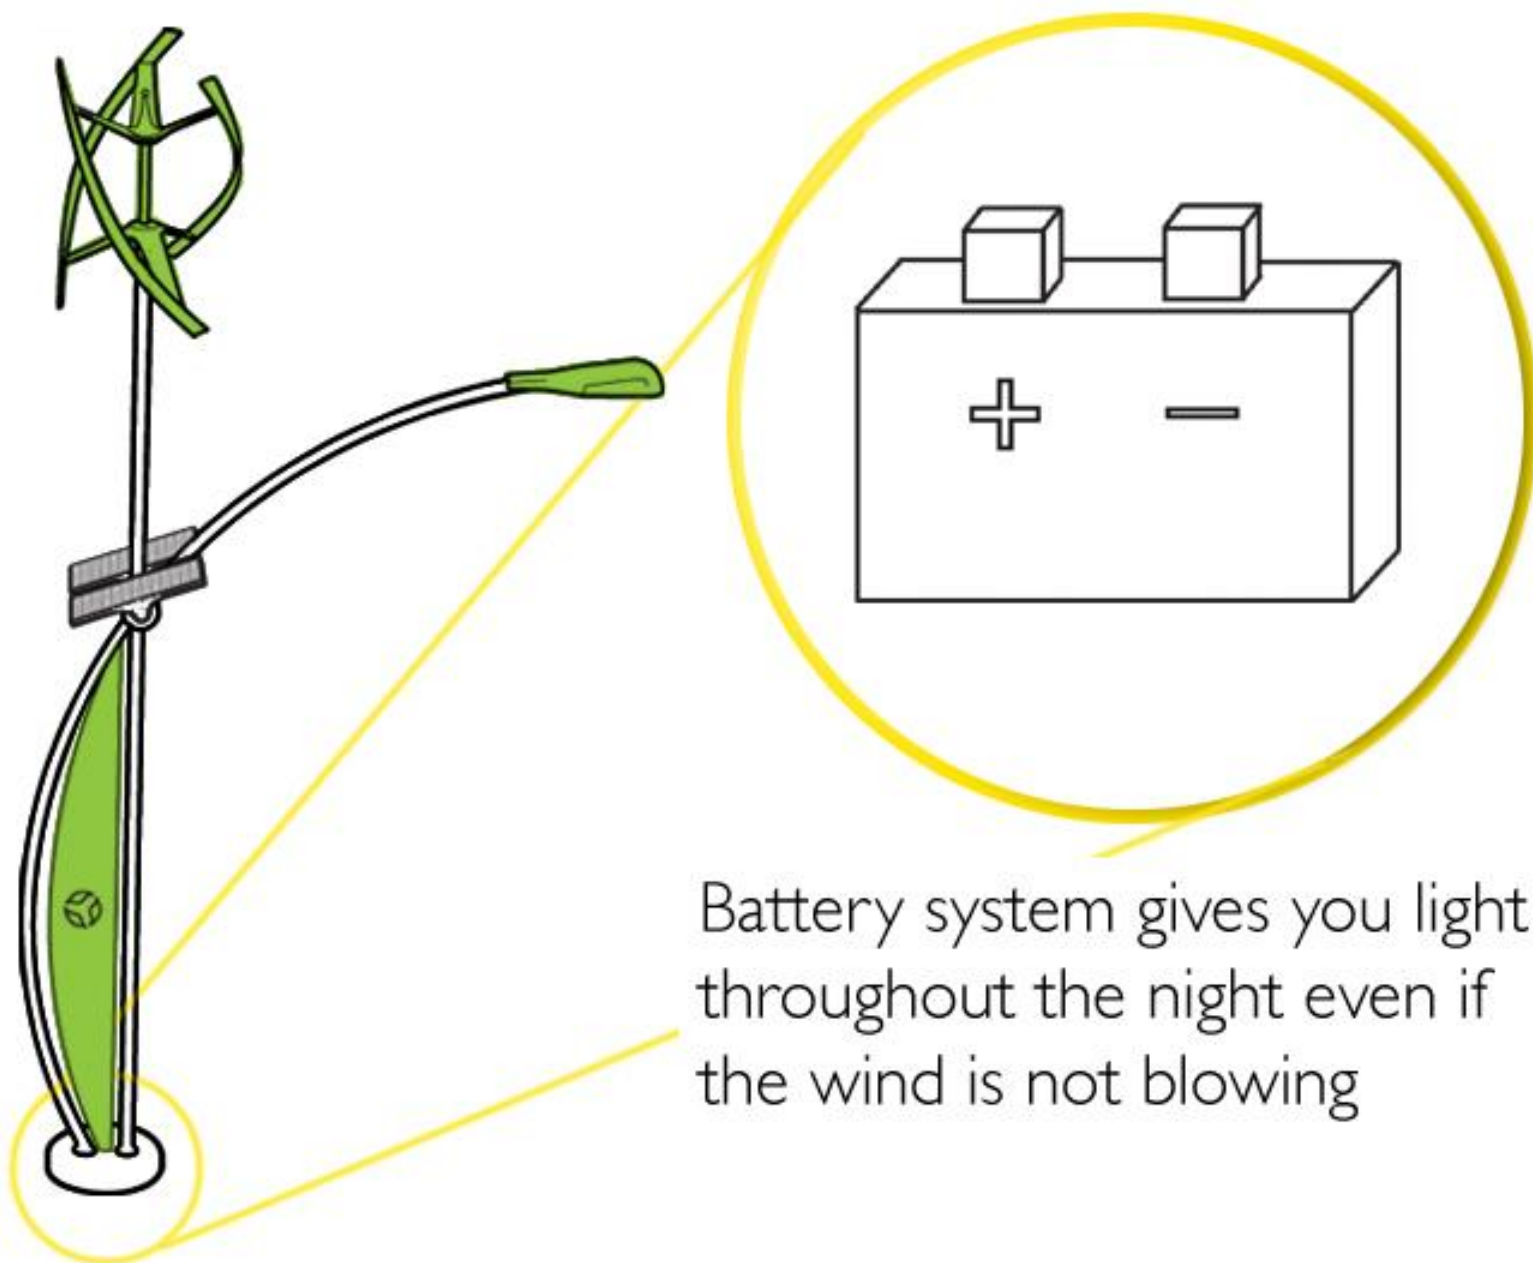

Solar pannels harvest energy from the sun

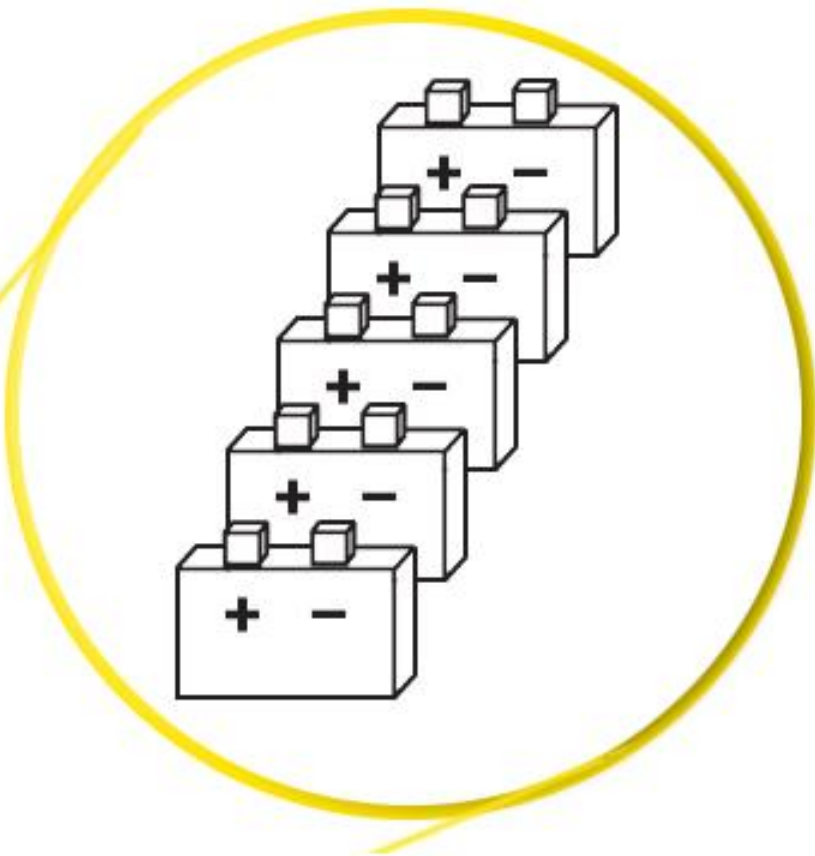

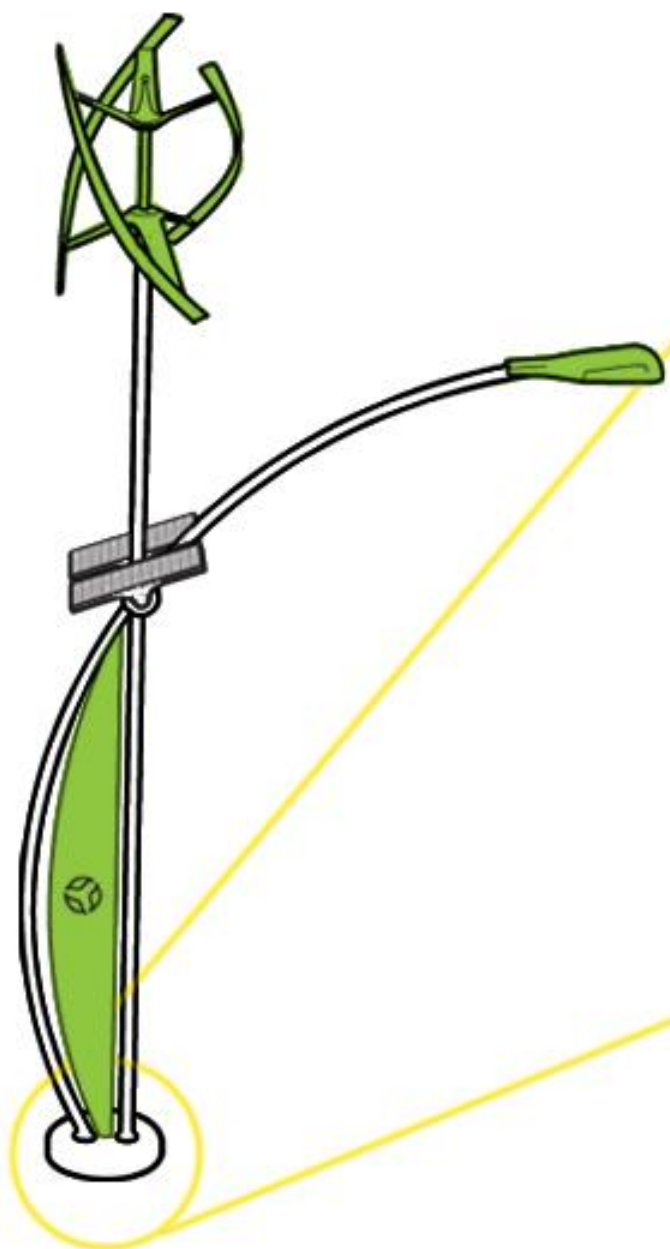

LED lights are available for all applications

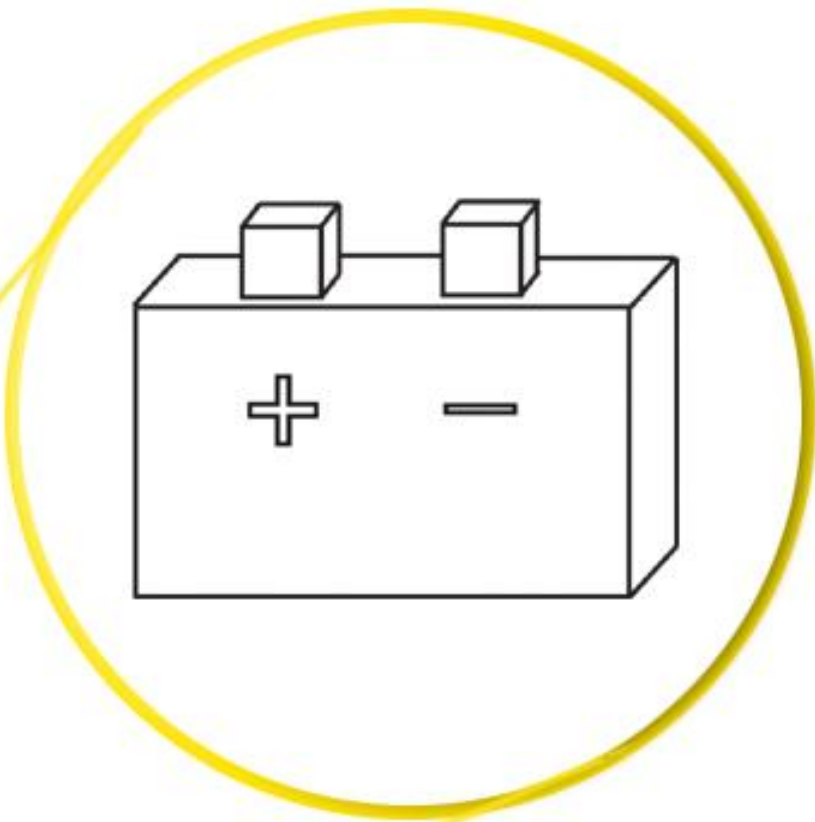

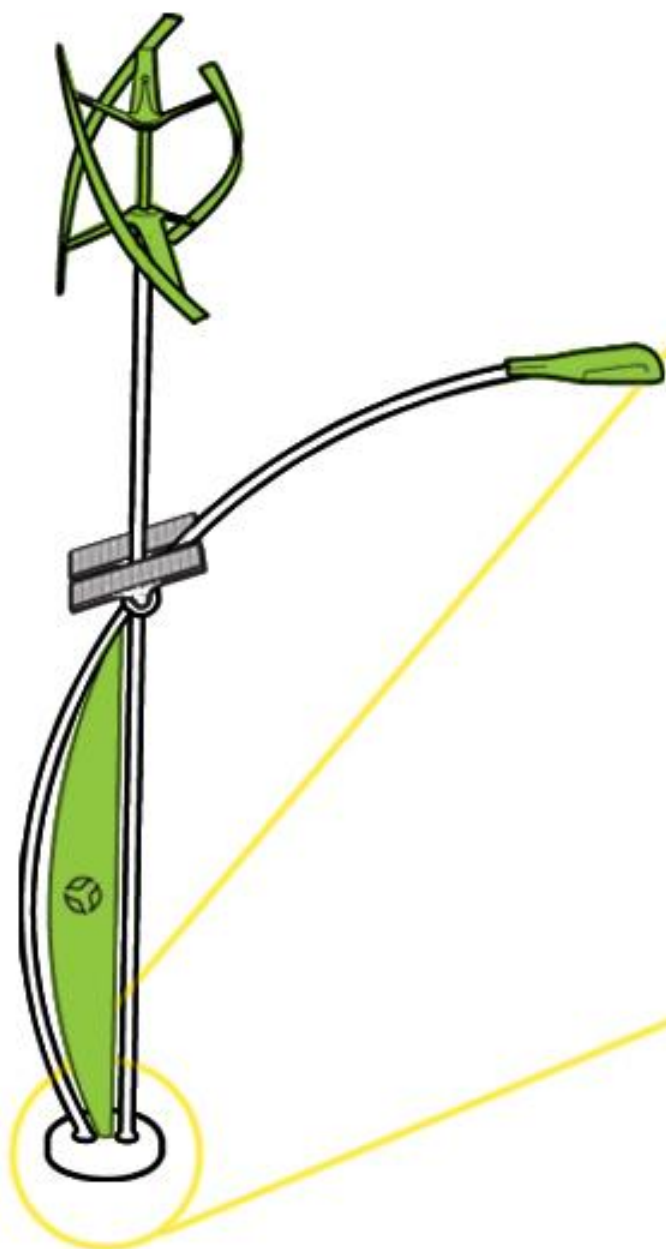

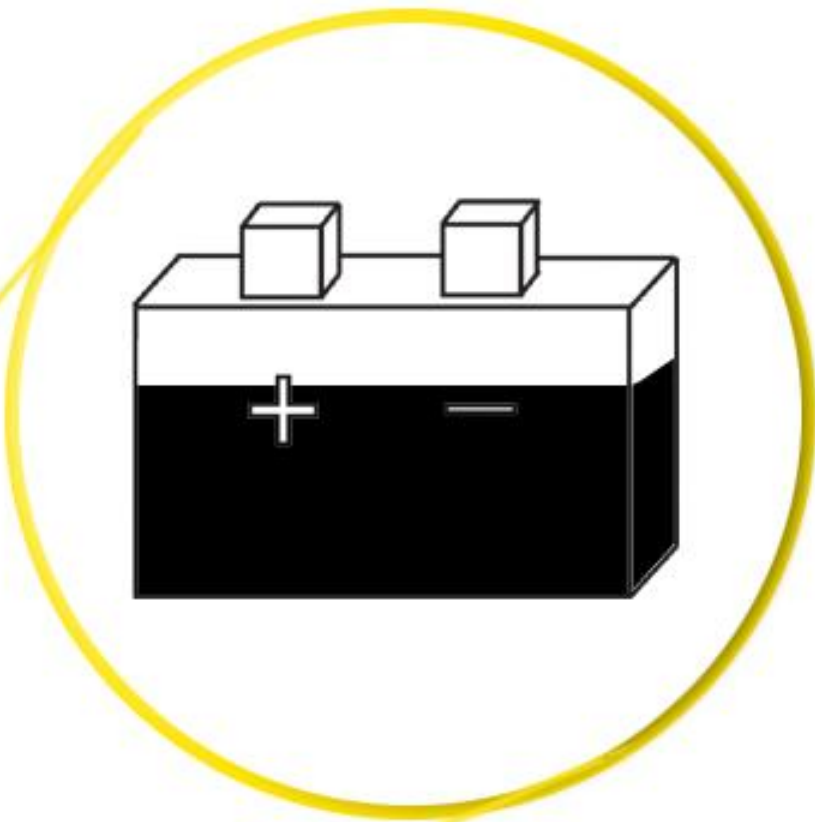

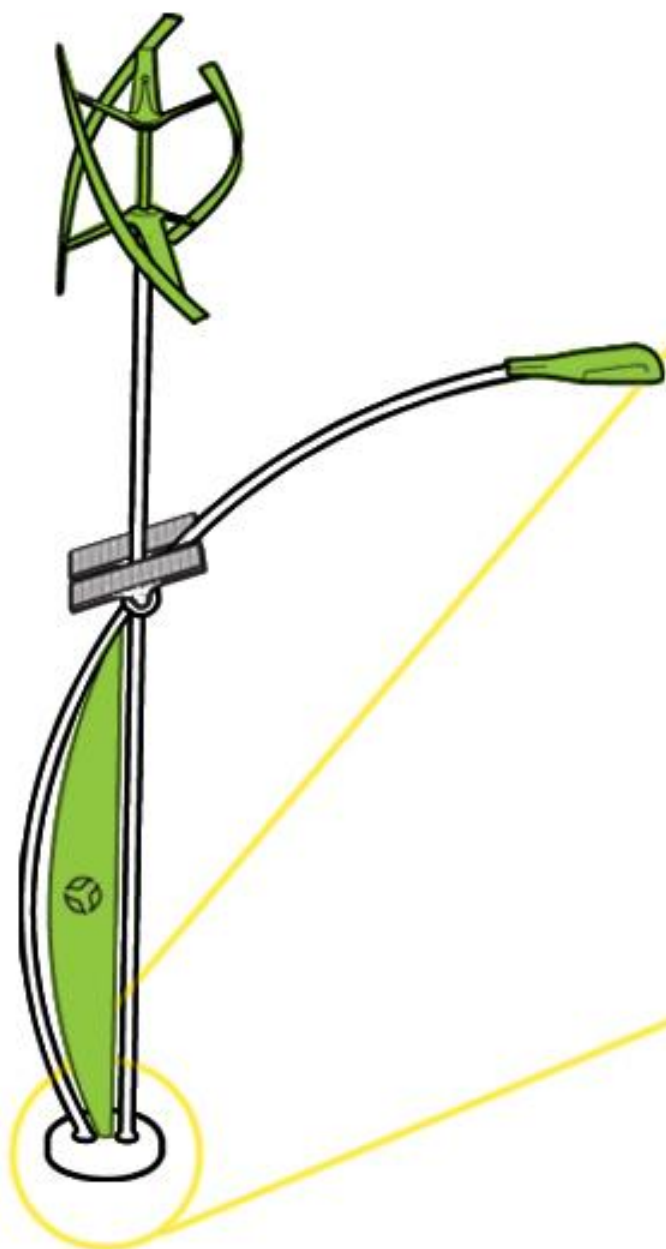

Battery system gives you light throughout the night even if the wind is not blowing

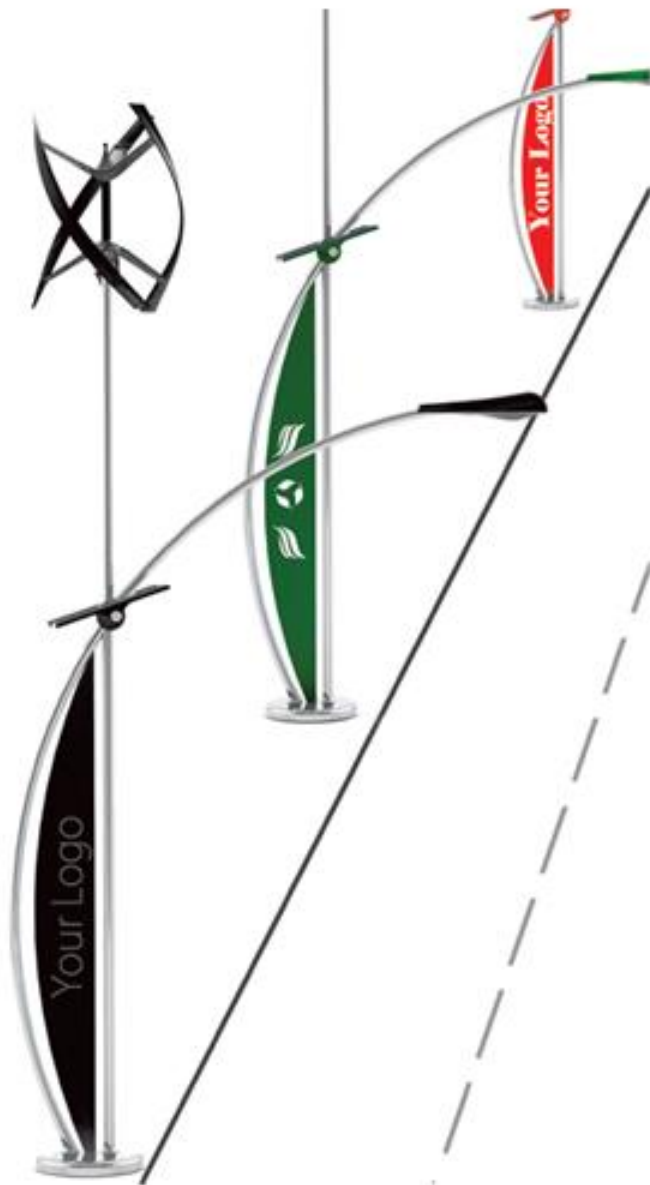

In the Sanya system the battery lasts five nights

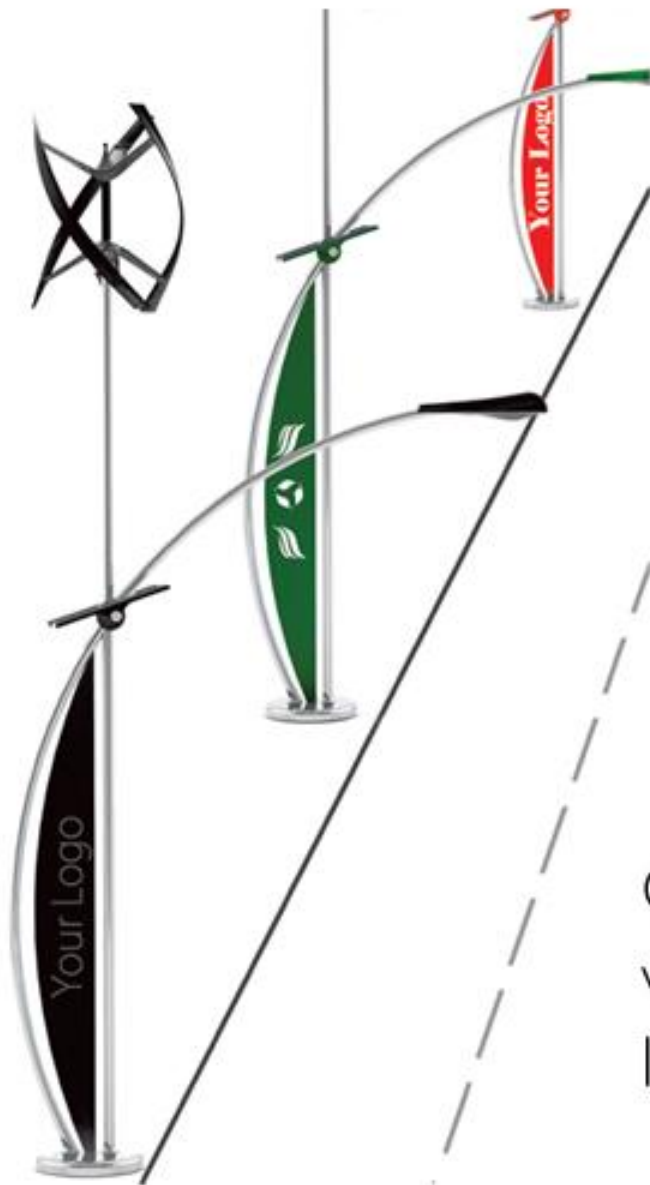

Choose Sanya GB if you wish to back-up your battery with grid power for prolonged periods of low wind

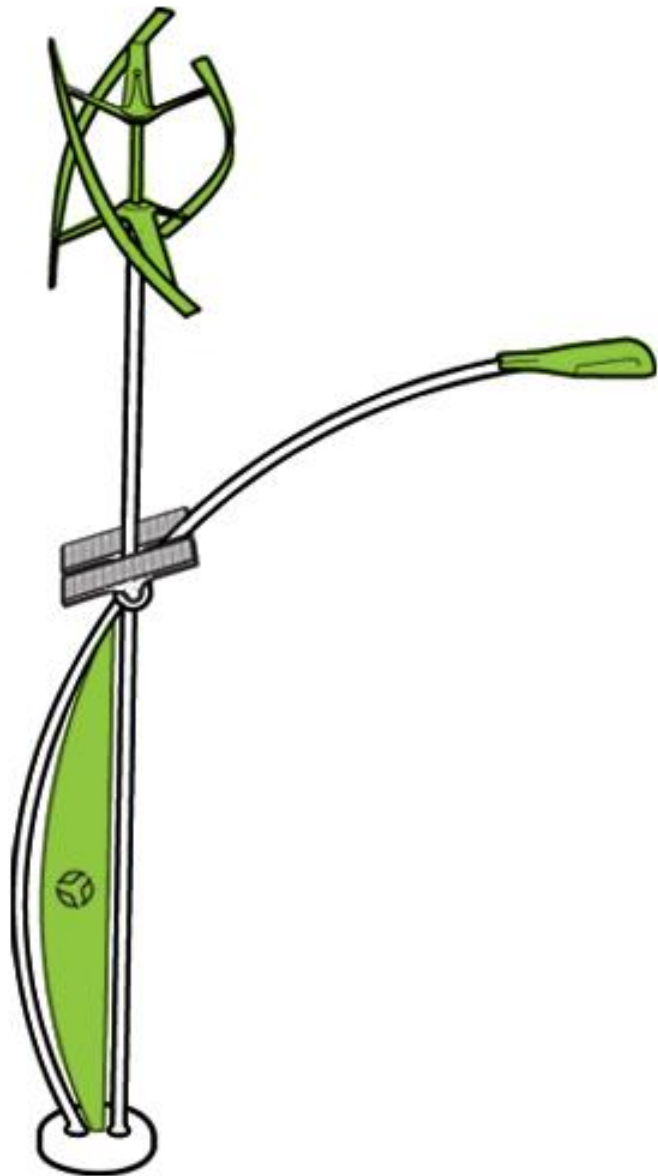

The Sayna GB battery lasts one night and grid backup kicks in when the charge falls below 20% capacity
